Technical solutions for vehicle tracking & video telematics

THE HEART OF YOUR BUSINESS IS YOUR FLEET

Why is the question? Vehicles can now use high-speed data communication systems to transfer a greater range of data that is produced by various vehicle sensors, components, and systems.

CENTRALISED MANAGEMENT

You can track drivers, vehicles and other things all in one location, providing you complete insight and more power over your whole fleet and assets.

GET THE PROPER SYSTEM

Our professionals have designed our software and services to fit the demands of businesses of all sizes and types.

ORGANIZE YOUR TEAM

To manage urgent shipments, allocate orders to one of your fleet's closest vehicles at any given time and go above and beyond your clients' expectations.

GET INSIGHTFUL INFORMATION

Real-time analytics collection and viewing, graphical data, and route history are all provided so that you can move quickly to seize opportunities and solve issues.

MAKING BETTER PLANS FOR THE FUTURE

Your fleet transports you to new locations. Creating possibilities at the regional, national, and global levels. And if it stops, everything comes to a standstill.

Maintain momentum with Fleetwitness live. Learn how your fleet functions by utilising intelligent data. Almost everything can be tracked and monitored, from GPS and telematics to fuel consumption, route history, and much more. Fleetwitness Live enables you to operate more effectively and efficiently by automating your procedures. Our customizable software and services equip you with the tools you need to stay current, boost productivity, and surpass client expectations. With us on your side, you'll be able to expand your fleet and your business.

QUICK ANALYSIS

Utilize each asset more effectively by measuring and analysing KPIs in real-time. This enables you to identify areas where expenses may be cut quickly while generating a return on investment.

ACCESSIBLE ADMIN

Enter orders, manage them, collect and archive relevant data including driver profiles, vehicle histories, and technical specs to keep your virtual paperwork organised.

INCREASED SCALING

No matter how big your organisation gets, our platform can keep up. Even if you are in charge of several locations, or regions, you may still use our solution.

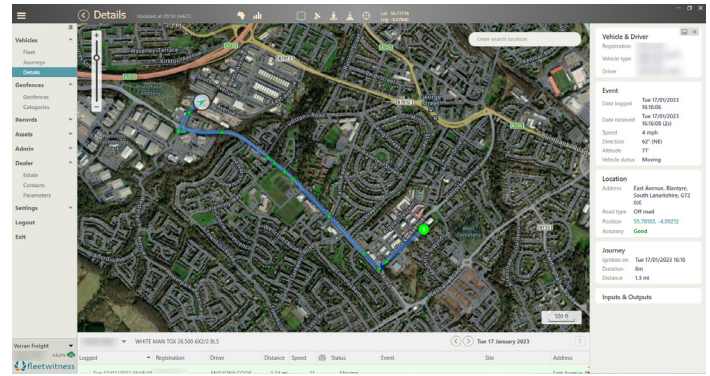

CREATE ALERTS

Automated dashboard notifications will keep you organised, efficient, and compliant at all times from reminders for maintenance to geofencing zones.

MORE THAN JUST TRACKING

Vehicle Tracking and Trip Maps Quickly Pinpoint your Vehicles

- See vehicles nearby for urgent call-outs
- Colour-coded routes to show speed at each stage of the journey
- Use Street View photography to see exact location of an incident

Timesheet Reports Save Time and Reduce Costs

- Get daily timesheet reports for individual drivers or a group of vehicles
- See details of journeys made including start / finish times, arrival at first destination and departure from last destination
- Determine whether vehicles are used for unauthorised trips during the day or after hours
- See time on site to assist with client queries, driver pay and customer invoicing

Verran Freight	8.9				196 mi	4:20
Verran Freight	9.1				1486 mi	44:43
Verran Freight	3.6				157 mi	5:13
Average	6.8				933 mi	30:04
Total					9330 mi	300:45

*A cyan text colour indicates the value has been calculated based on configured parameters as opposed to data received from the tracking device

1/1

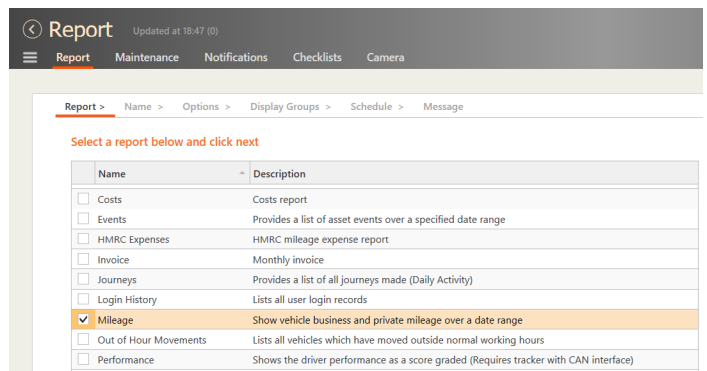

Unlimited Geofencing Alerts to your Inbox

- Specify an area where drivers should or shouldn't be operating
- Set up “prohibited zones” - this can help avoid employees disappearing off to unauthorised zones
- Set up “mandatory zones”, the area that the vehicle must remain in
- Get instant email alerts allowing immediate response or enable a delay of your choosing.

Comprehensive Reports Improve Productivity

- Analyse the data to identify the best drivers, make sense of mileage and fuel costs, and remove regulatory paperwork headaches
- Access a vast, yet uncomplicated array of reports. Summary time sheets and out of hours usage can all be sent to your inbox
- Web-based reports accessible anywhere
